Qualifications and Experience

- Bachelor of Exercise & Sports Science | AES | ESSAM
- Master of Clinical Exercise Physiology | AEP | ESSAM

Bio

In the past I have been an active cyclist and martial artist for the most part of my life. These days it's more about looking after my musculoskeletal system and preventing a decline in my general health & wellbeing. Exercise must become an integral part of our lives, something we do without a second thought, like brushing our teeth or having a shower. The day we stop moving is the first day of the end of our journey here on our earth.
